# Challenge 8 : Welcome to... Troyes !

Christmas 900 is special in Troyes. Benoît and Alain, strange passing troubadours, catch the eye of every citizen. Their sense of celebration promises a special Christmas around magnificently decorated trees that they cut themselves from the nearby forests. What visionaries they were when this tradition would not extend to everyone until a few centuries later! However, the clergy do not welcome this eccentricity with much pleasure...

Difficulty: ★★★

SETUP

Don't number the dice in the 6 columns:

Draw Christmas trees in the red and yellow districts like this (not in the white districts!):

PLAYING THE GAME

SPECIAL RULES:

1 Each half day, if you choose a die of a value that you have not already entered in any column, before using it to perform an action you must choose a column that is not yet numbered and number all 3 of that column's dice with the value of your chosen die. You must number the columns according to the following rules:

- Values from 1 to 6 must be used only once per district (a district includes all buildings of the same color).
- Values in the same column must be identical.
- Each player may number their columns differently.

Nothing happens if a black die attacks a die that is not yet numbered. It is also impossible to build a building received as a bonus (by tracks bonus) in a column that is not yet numbered.

2 When the 2 buildings surrounding a Christmas tree are built, circle this tree. At the end of the game, win: 3/6/9/13/17/21 for 1/2/3/4/5/6 circled Christmas trees.

During Phase 1 (Roll the Dice) of each half day, roll all dice as normal:

	Die 1	Die 2	Die 3	Black die
Morning	?	?	?	?
Afternoon	?	?	?	?

Scores to beat: *(First game/Best score)*

Alain : **63 64**	Xavier : **64 64**	Sébastien : **52 52**	Benoit : **46 56**
